

WA'S PREVOCATIONAL FRAMEWORK NEWS

Postgraduate Medical Council
of Western Australia

Issue #2

Assessment Review Panel

As of January 2024, each site will be expected to have an Assessment Review Panel to determine the global assessment for each PGY1 and PGY2 trainee (AMC may delay the inclusion of PGY2s). The panel will consider the outcomes of the Entrustable Professional Activities (EPA) assessments and the end-of-term assessments to make a judgement of whether the prevocational doctor has achieved the prevocational outcomes at the end of the year. It is anticipated that the introduction of this Panel in 2024 will simply formalise and support processes that many health sites currently undertake.

Medical Education Symposium

The theme of PMCWA's 2022 Medical Education Symposium is Change and Innovation with a key focus being on WA's implementation of the Prevocational Framework. The PMCWA team will lead an exploration of the key components of the Framework and we will also hear presentations from other groups that have implemented EPAs.

To register for the Symposium and increase your knowledge of the Prevocational Framework, [please view our events page](#).

e-Portfolio

The e-Portfolio is a key component of the implementation of the Prevocational Framework which will be ready to go live in 2024. This new digital platform will bring many benefits which will support the revised training and assessment process. The procurement process is currently sitting with the AMC, who are liaising with the national Health Chief Executive Forum, with a decision anticipated to be made by the end of 2022. This will allow the focus of 2023 to be on purchasing, building, trialling and training our users on the new system.
